

Mark, age 58, wants long-term certainty while ensuring his savings can continue to provide meaningful support for his family after he's gone. His key priorities include:

- Locking in guaranteed growth for retirement
- Avoiding market exposure
- Providing a meaningful legacy for his family

The 10-year guaranteed term available with the **Guaranteed Accumulator 10** delivers extended rate security, and the enhanced death benefit helps ensure value transfer regardless of market conditions or timing of death. He decides to purchase this annuity with \$100,000.

DAY 1 PREMIUM + 3% PREMIUM BONUS	1ST YEAR ACCOUNT VALUE	ACCOUNT VALUE AT END OF TERM (10 YEARS)	EFFECTIVE ANNUAL YIELD 1ST GUARANTEE TERM*
\$103,000	\$108,737	\$177,110	5.88%

Guaranteed Initial Interest Rate 5.57% for 10 years. Assumes no withdrawals.

In addition, the Enhanced Death Benefit Rider provides confidence that his beneficiaries would receive an enhanced death benefit — up to 110 percent of the accumulation value — should he pass away early in retirement, helping to preserve and transfer wealth with certainty.

Mark's agent shared this example to show how the enhanced death benefit would work. If Mark passed away at the end of the contract term that **Account Value of \$177,110** would be multiplied by **110%** and his beneficiaries would receive **\$194,821 as a death benefit**. As his account value grows so does his death benefit.

Marquette Indemnity & Life Insurance Company
