

Steve, age 63, is close to retirement and looking for a safe, predictable place to reposition a portion of his savings. His key priorities include:

- Higher guaranteed growth during his final working years
- Tax-deferred accumulation
- A strong death benefit if retirement plans change unexpectedly

The five-year guaranteed term available with the **Guaranteed Accumulator 5** matches his retirement timeline, while the enhanced death benefit helps ensure that his family is protected if he passes away before retirement. He decides to purchase this annuity with \$100,000.

DAY 1 PREMIUM + 3% PREMIUM BONUS	1ST YEAR ACCOUNT VALUE	ACCOUNT VALUE AT END OF TERM (5 YEARS)	EFFECTIVE ANNUAL YIELD 1ST GUARANTEE TERM*
\$103,000	\$108,820	\$135,577	6.28%

Guaranteed Initial Interest Rate 5.65% for 5 years. Assumes no withdrawals.

In addition, the Enhanced Death Benefit Rider provides confidence that his beneficiaries would receive an enhanced death benefit — up to 110 percent of the accumulation value — should he pass away early in retirement, helping to preserve and transfer wealth with certainty. Steve's agent shared this example to show how the enhanced death benefit would work. If Steve passed away at the end of the contract term that **Account Value of \$135,577** would be multiplied by **110%** and his beneficiaries would receive **\$149,134 as a death benefit**. As his account value grows so does his death benefit.

Marquette Indemnity & Life Insurance Company

744 KING STREET, JACKSONVILLE, FL 32204
